

Thank you for reading our exclusive **HQ G2A Method**.
You made a smart choice of reading this PDF!

With this method you will be able to get anything from <https://www.g2a.com> completely for free. This exploit works for literally any product that is available for sale on G2A. I personally would get gift cards & games.

We can assure you this method has been crafted to perfection.

How does the method work?

We will use a script via Violentmonkey which changes the timezone in our browser whenever we make a new order on G2A. As soon as we get redirected to the payment page, our exploit will activate, which results in the order getting marked as “Expired” on G2A’s payment processor, but not on G2A’s side itself. If we pay for the products via Bitcoin - our order will be processed and delivered by G2A anyway but the Bitcoin we sent will then get **INSTANTLY refunded back to our wallet.**

QUICK INSTRUCTIONS:

1. Install the Google Chrome extension "[Violentmonkey](#)"
2. Add the script to Violentmonkey - [auto-install](#) or [script.txt](#)
3. Make a new order on G2A and pay with Bitcoin.
4. Get your products (the order will be processed by G2A).
5. Wait a few minutes for the refund to go back to your wallet.

Important - PLEASE READ

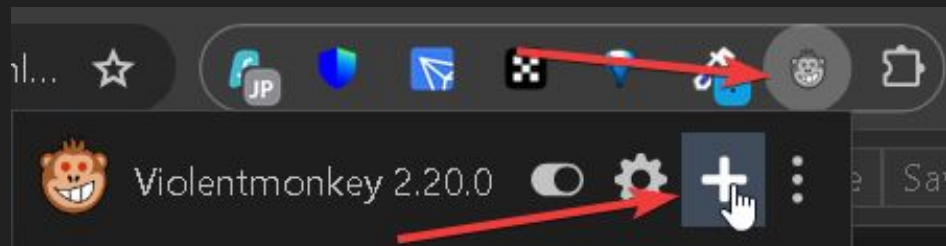

G2A will only refund your expired order if it's above 0.0014 BTC. Smaller amounts might not get refunded automatically and you may need to contact G2A's support. This could cause your request to be rejected if they find out the order was processed. Using amounts equal to or greater than 0.0014 BTC will get refunded without problems.

There are no limits, just add products to your cart totalling 0.0014 btc. I personally purchased 1 x \$500 Amazon Gift Card for the sake of this PDF.

Full Guide:

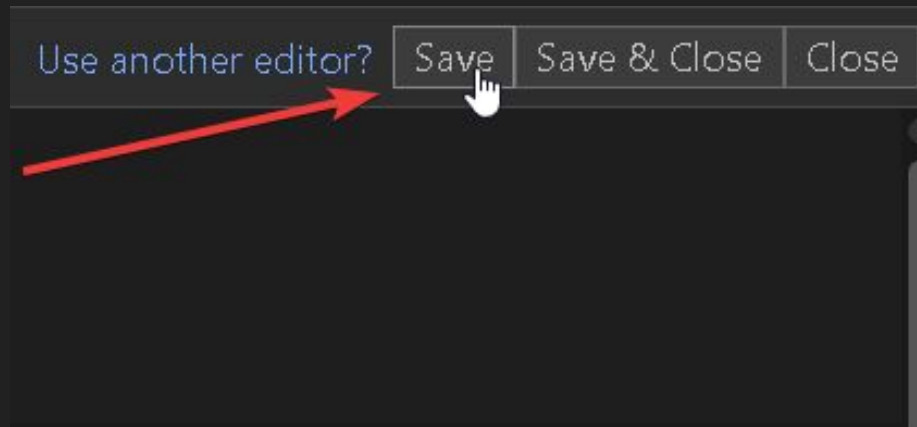

1. Have at least 0.0014 in BTC to pay for the order. (Your order can be multiple items.)
2. Google chrome browser and install the Violentmonkey extension - <https://chromewebstore.google.com/detail/violentmonkey/jinjaccalgkegednnccohejagnlnfdag> - Simply search on google for “Violentmoneky Chrome” if the link is no longer working.
3. Load the script via auto-install or manually script.txt.

4. If you've done manual paste the script in the **Violentmonkey** editor. (I recommend doing auto-install for convenience)

 **EASY & SECURE PAYMENTS**

   and 30+ more

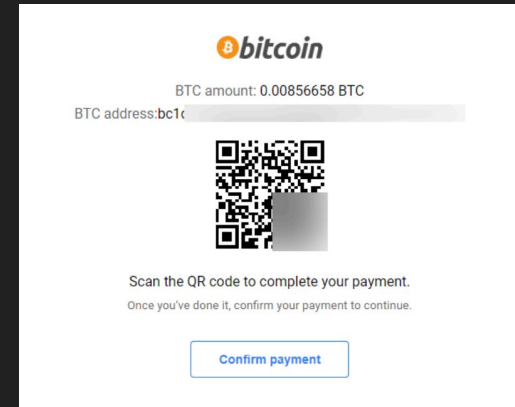

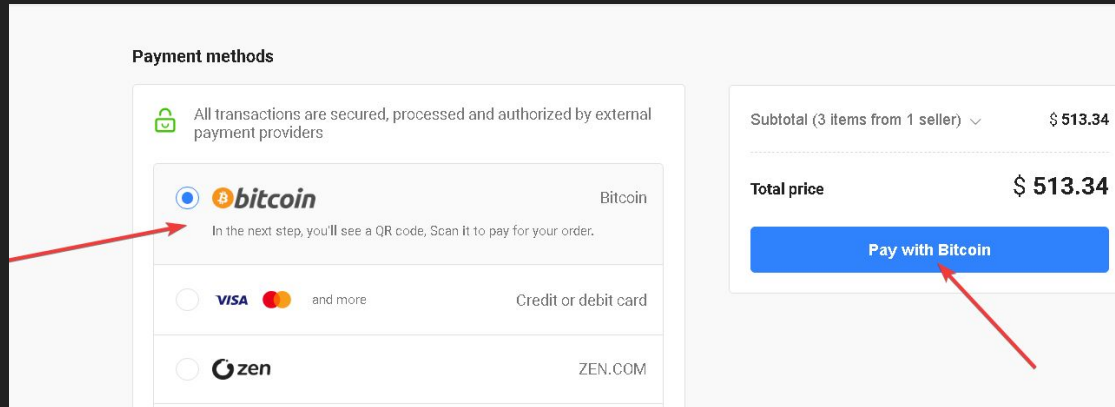

6. Accept Terms & Conditions, Insert your email address and click *"Continue to payment"*.

As soon as the payment page starts to load, you should see this message. Simply press "OK" to continue.

7. Simply pay for the products by sending Bitcoins to the address displayed in your order.

8. Once you've made the payment press "**Confirm payment**", the status should change to "**pending**." Now wait for 1 confirmation. As soon as your transaction gets 1 confirmation in blockchain (shouldn't take longer than 30 minutes), **you will receive an email from G2A with your purchased products.**

Session expired!

Your session has expired. If you completed any payment, it will be refunded to your wallet within a few minutes. We apologize for any inconvenience this may have caused.

The End

Additional Info: Possible Errors and Solutions

If you can't see payment methods, or if you can't "Continue" to see the Bitcoin address, amount, and you see the "Something went wrong" message or anything similar, it means that either your IP/email/session/browser fingerprint has been banned. In that case, you should first try:

- 1) Clearing your cookies and try again, if error persists, try:
- 2) Clearing cookies again and using a different email on checkout this time. If the error persists, try:
- 3) Changing your IP address (try using a VPN - I personally use NordVPN) + take actions from Step 2 again.
- 4) If you still get this error, then change your IP again, use a different email (USE GMAIL) but this time use "Incognito mode" in Chrome.
